

OCEAN SAID TO RUN 9000 BBLs.

El Paso Well Is Doing Better Every Day and Not Yet Into Sand.

News received at the local office of the Ocean Oil and Refining company is to the effect that the Ocean well is making considerably better than 9000 barrels of oil daily. Some estimates have made it as high as 9900 barrels. The exact flow cannot be determined, owing to the heavy gas pressure.

The well has not been drilled into the sand and the flow is coming from the top. Late Sunday afternoon the drill was let down into the hole to regulate the flow and to relieve the gas pressure.

Notes—Dr. J. A. Pickett, Residence 79, 90, omitted from July directory.

DOCTORS USE CALOTABS FOR COLDS AND FLU

Influenza and Grippe, Like Ordinary Colds, Require Calotabs, the Purified and Refined Calomel Tablets That Are Nauseous, Safe and Sure.

Physicians and druggists claim that the great epidemic of influenza has conclusively demonstrated that the quickest relief for a cold and the best preventive of influenza and pneumonia is to keep the liver active so that the digestive organs may be in perfect condition. For this purpose Calotabs, the new nausealess calomel tablets that are free from the sickening and weakening effects in the most thorough and dependable as well as the most agreeable laxative.

Calotabs have the special advantage of not making the patient sick and weak, as they do not upset the digestion and appetite. One Calotab at bed time with a swallow of water—that's all. No salts, no nausea, nor the slightest interference with your eating, pleasure, or work. Next morning your cold has vanished, your liver is active, your bowels are purified, and you are feeling fine with a hearty appetite for breakfast.

For your protection, Calotabs are sold only in original sealed packages, price thirty-five cents. Sold by all druggists and your money back if you are not delighted with them.

PIEDMONT Peanut Oil

—makes a delicious salad dressing, is an economical shortening and fries "deep" without burning.

HOMER UNION Highly Welcomed

El Paso Investors Make Many Inquiries About New Company

The welcome with which Homer Union has been received in El Paso is a source of genuine satisfaction to the officers of the company. Since our first announcement eager inquiries have been coming from hundreds of our friends and former shareholders. Everyone who has followed us has made money. Several of the prominent brokers of El Paso have thoroughly examined Homer Union's organization and the value of its holdings, and to a man endorse it as one of El Paso's foremost companies. The Porterfield and Smith interests feel that Homer Union is the supreme effort of their successful promotions, and recommend it as a peer to Ocean if not its superior. This is saying a great deal—Ocean is to pay its first dividend of 100% about November 3rd. Homer Union's holdings are in the world's greatest oil field, its 40-acre tract is three-quarters of a mile from the world's largest gravity oil well, making 30,000 barrels. Four tracts closely surround this well on four sides. Can you imagine a higher class proposition?

Orders are coming in fast. Wire for reservations. Write for literature.

GREAT GASSERS BUT LITTLE OIL

No Production Results From Operations Around Amarillo.

Amarillo, Texas, Sept. 29.—Drilling operations continue active in the Amarillo field. Although there is no oil producing well near here, oil has been found in small quantities in several wells. Great gassers have been found in every district of the field and because of this, oil men say much oil will be found here in the near future.

Not since the Amarillo field came into the limelight has so much interest been displayed by the people in the neighborhood. Every well seems to indicate that oil wells will soon be gushing.

Eighteen miles northwest of Amarillo, the Haines No. 1 well, has recently been brought in. The well is making nearly 4,000,000 cubic feet of gas from a depth of 2,500 feet. This flow of gas coming up through the well water, the water will be cast off at once.

Well Down 1100 Feet. On the Canyon, the Palo Duro well is drilling at 1100 feet. The well has been encountered in this test, but the drillers are now drilling in a blue shale formation. This well promises to be a good one. Some operators say this is the best location in the north-west field.

The Happy Oil and Gas company is drilling at 600 feet. The Seven States test five miles northwest of Amarillo is changing rigs.

The Hives No. 1 is drilling at 1475 feet.

Good Showing Made. The Glen Rio well is drilling at 719 feet. The well has been encountered in this test, but the drillers are now drilling in a blue shale formation. This well promises to be a good one. Some operators say this is the best location in the north-west field.

The Bonita Creek test, north of Amarillo, is drilling at 500 feet. The Gulf Production company's test in the Canyon, 20 miles north of the Panhandle, is drilling at 500 feet. The Black Creek well in the Cleburne district is drilling at a depth of 500 feet.

The Lela Lake company's No. 1 well, north of the Lela Lake, is drilling at 1800 feet with a showing of oil.

Oil Production Shows Decline in Past Week

The last week's production of the north central Texas oil field was given at 23,500 barrels daily, a decline of 23,500 barrels from the week of 25,800 barrels. The decline is accounted for by the fact that the field is now producing in a blue shale formation. The decline is accounted for by the fact that the field is now producing in a blue shale formation.

On a basis of only \$1000 per acre, the Marigold Oil and Gas company, it is asserted, could make a profit. The company is now producing in a blue shale formation.

In addition to \$150,000 and two wells in block 87 and two wells in block 88, the company is now producing in a blue shale formation.

Geologists claim that oil sand will be struck at 4000 feet, which ought to be good for 1000 to 10,000 barrels.

Palomas Basin Company Gets Oil and Gas Rights

The Palomas Basin Oil company, a New Mexico corporation, has acquired the oil and gas rights in the Palomas basin in Pecos county, N. M.

Other officers of the company are: P. E. Winters, of Hot Springs, Sierra Blanca, N. M., president; J. M. Backus, of same place, secretary; and W. R. Stevens, of El Paso, treasurer.

Small Wells Brought In in the Tulsa, Okla., Field

Tulsa, Okla., Sept. 29.—The Oage Development company has completed its No. 1 in the southeast quarter of section 14-12-12. The well is making 40 barrels of oil daily.

In the same county the Echo Oil company has a 20 barrel well in the northwest quarter of section 4-24-12. The well is making 40 barrels of oil daily.

In the Pecos district the Ridge Oil company's No. 3 and No. 7 are completing. Both wells are situated in the southwest quarter of section 14-12-12 and the wells are producing 400 and 450 barrels of oil daily.

In Le Flore county the P-B-L-Oil and Gas company is on top of the sand and shale at a depth of 1000 feet. John T. Howell property, Potomac, Md. A small showing of gas has been found in this well.

This test is one of the deepest ever drilled in this vicinity. No oil has been found in this county since the some of the states best gassers are hereabout.

Finley-Tampico Company to Drill in Hudspeth Co.

The Finley-Tampico Oil company, capitalized at \$100,000, is to complete 25,000 acres of prospective oil lands in the Finley mountains region of Hudspeth county, Texas.

The officers of the company consist of the following: Robert A. Gork, chairman of the board of trustees; E. R. Plumb, president; Dr. H. Morford, secretary; and Dr. H. Morford, treasurer.

Well, Flowing 200 Barrels. The El Paso Refining company's well on the Sue tract, in the Glen section, southwest of Amarillo, Tex., is reported as flowing about 200 barrels and is not yet completed.

Dr. Cook Leases Land. Marshall, Texas, Sept. 29.—Two thousand acres of Harrison county land has been leased by Dr. Frederick A. Cook, Arctic explorer, for oil prospecting.

Curtiss & Co. buy Liberty Bonds.—Adv.

FEEL EXTENDED TO NORTHWEST

New Wells Brought In During the Past Week Around Burkburnett.

Burkburnett, Texas, Sept. 29.—A 2500 barrel well has been completed in the northwest Burkburnett field by Kimmell and Dillard. This is the No. 2 Taylor. It is producing from the Waggoner sand.

The Wagoner Oil company in the same field is flowing by heads every few minutes. The casing has been set and the estimate of production should be made within a few days. A rough estimate is that the well will make about 800 barrels of oil daily.

In the far southeast corner of block 511, Red River valley lands, the McIntosh Oil company is flowing 1000 barrels of oil daily. This well is about half a mile south of the Burkburnett field.

The Wagoner Oil company is flowing from a well on the Wagoner sand, a distance of half a mile southward, from a depth of 2,500 feet. This flow of gas coming up through the well water, the water will be cast off at once.

The Wagoner Oil company is flowing from a well on the Wagoner sand, a distance of half a mile southward, from a depth of 2,500 feet. This flow of gas coming up through the well water, the water will be cast off at once.

Operators See Bright Prospects At Henrietta

Believed That Oil Production Will Be Greatly Increased in Oklahoma.

Henrietta, Okla., Sept. 29.—A new era of development is expected by oil operators for this vicinity. It is a general belief that the oil production of the field will greatly increase from now on. Three hundred barrels of oil is flowing from the R. H. Black well, two and a half miles northwest of Henrietta in section 34-12-12. The well is three feet in the producing sand and encountered at 2800 feet. The well will be deepened to get a larger production.

Vernon and Babby are spudding in at a depth of 3000 feet in their well two miles southeast of Henrietta in section 20-11-12.

One million feet of gas is flowing from the well of D. C. Wise and others a mile south of Henrietta from a depth of 2,500 feet. The drillers have reached an encouraging showing of oil and expect to drill the well to a depth of 3,000 feet.

Kimbley and company are in a sand formation at 2300 feet. They expect to get a good production from this sand and believe that this well, which is only a mile west of Henrietta, will develop into one of the best tests in the district.

A boiler exploded at the deep test of the Francis Oil company and a number of people who had come to the well to witness the drilling in narrowly escaped death. For some time this well has given good showings of oil and it is believed that it will be a good well when completed.

Drill Encounters Second Oil Sand Near Electra

Abilene, Texas, Sept. 29.—A second oil sand has been encountered in the Sears well, near Merkel, at a depth of 2800 feet. Drilling is continuing in the hole. It brought up about half a barrel of oil. The well is about a mile and a half north of Electra.

On the 20th Allen tract, the Leon Oil company, has two wells producing from the black lime and two other wells are being drilled.

West of Allen tract the Albers Oil company has a producer on the Turner tract. This company's second hole promises to be a producer at an early date. On this same tract Barclay, et al., have a small producer.

The Pleasant Grove school lot has a good producer in the well completed a short time ago by Valentine. Many other operations are underway on this property. On the west acre, Fain and associates are rapidly advancing the black lime formation in their test.

Ranger Central Near Black Lime

The Ranger Central company is approaching the black lime formation in its test on the Brooks lease. The company is now producing in a blue shale formation.

The Southwest Oil development company has a well on the black lime formation. The operators are deepening the well, believing that the big pay will give an early production. This same company is spudding in for a second test on its holdings on the black lime.

The Gulf Production company is rapidly bringing its four wells on the Calvin Perkins tract toward completion. These wells are producing from the black lime. A new rig is being built for the No. 5 Perkins of this company. The rig is being built and burned down a short time ago.

Three miles southeast of Eastland the Cooper Oil company is drilling at a depth of 3175 feet.

Railroad Relieves Oil Field Congestion

The M. K. & T. is relieving the bad freight congestion in the Wichita Falls, Texas, district and its oil fields by getting more locomotives. It has 140 locomotives and eight more should be in that section by this time. The M. K. & T. is completing its trackwork improvements in the Burkburnett and Waggoner oil fields.

Three Hundred Barrel Well in Near the Silver Cycle

News received at the local office of the Silver Cycle Oil company from Wichita Falls is to the effect that a well at a depth of 1700 feet, making 300 barrels of oil daily, has been brought in. The well is situated in the Silver Cycle's 20 acre holdings in the Donahue tract, southeast of Burkburnett. The well is being deepened to a depth of 2,000 feet.

The Silver Cycle is running some of its oil into the pipe lines and the congestion there is gradually being relieved. Silver Cycle expects early to pay a dividend.

Wells are Spudded in

Decatur, Texas, Sept. 29.—A number of wells are being spudded in within a few miles of Decatur by New York and Tennessee parties. The Conley well, near Union, northwest of Decatur, has just been spudded in.

Marigold Expects Well Soon

The Marigold Oil and Gas company is expecting a well on block 75 in Burkburnett, Texas, about October 5. Its well in block 97 is expected in about 10 days later.

Have a complexion that everyone admires

Don't envy a good complexion, have one. Each time you cleanse your face with Resinol Soap you give it a "beauty treatment" with the soothing, healing Resinol medication. If aided, in severe cases, by a little Resinol Ointment, this usually leaves the complexion naturally clear, fresh and free from pimples, redness, roughness and blotches.

Resinol Soap

and Resinol Ointment are sold by all druggists. Try them and see how beneficial they are, not only for the skin but for the hair as well.

RECENT BARRIS AND DRILLERS

Ranger Central Nears Pay Sand in Its Well Near The Ocean.

Eastland, Texas, Sept. 29.—Drilling activities in Eastland county have been greatly aided by the recent heavy rains. Owing to the shortage of storage water it was necessary for many wells to shut down, but these are again drilling. The reservoirs and tanks are filled with water and the operators are in a much better mood, although the roads to and from the fields are almost impassable and materials can only be hauled to the field with the greatest of difficulty.

The Empire Oil and Coal company has completed a 1500 barrel well on the Peoples tract.

The McDonald Oil company has completed its well on the Barnes tract. It is making 900 barrels daily. The company is now producing in a blue shale formation.

The Root, Hupp and Duff operations continue active. The No. 2 is making 150 barrels of oil from a black lime formation. The No. 3 is a gasser, No. 4 is making 250 barrels daily, No. 5, 6 and 7 are drilling.

Three Wells Drilling

On the Perkins tract the No. 1 is drilling at 2550 feet; the No. 2 is drilling at 2100 feet and the No. 3 is drilling at 2000 feet.

Chapman has reached the big pay and dropped his tools in the hole of his last on the Sue tract. The well is making 500 barrels of oil and looks as though the production will increase when the hole is filled from the hole. After shooting its wells on the Sue tract the Hivie and the Tulsa Oil and Refining company increased the production in their respective wells.

On the 20th Allen tract, the Leon Oil company, has two wells producing from the black lime and two other wells are being drilled.

West of Allen tract the Albers Oil company has a producer on the Turner tract. This company's second hole promises to be a producer at an early date. On this same tract Barclay, et al., have a small producer.
